Hanging Fixtures

Veg Smart with Emerald Glow LED Hanging Fixtures

SolSolutions Emerald Glow Hanging Fixtures utilize Emerald Glow LED Grow Strips to give a variety of options for veg and greenhouse lighting.

Emerald Glow LED Grow Strips are the best in class low voltage, super efficient and powerful LED grow lights. These waterproof LED Grow Strips have a high color rendering index (CRI), which is a real full spectrum of white light, and a great color temp, with a specific use in high-grade horticulture.

Emerald Glow Hanging Fixtures are IP65 or above rated, perfect for NEC compliant wet location electrical installation. These LED systems are prime for extensive inside or greenhouse commercial installs where you need coverage for a bigger space.

LED Hanging Fixtures are an easy to use and dynamic replacement of florescent T-5 fixtures or HPS/metal halide lights for inside vegging to grow moms, clones, or any starts in a completely controlled environment. They work great for vertical veg racks or veg tables.

Emerald Glow LED Hanging Fixtures can also be used for greenhouse season extension and lighting supplement to increase your production and growth cycles. This assists your plants, especially in the off-season and lower light conditions, to continue to grow at their peak potential.

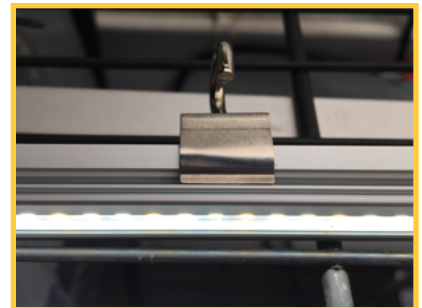

SolSolutions offers Emerald Glow Hanging Fixtures in three sizes to fit your location best.
