

Presents Firefly Batteries

The Next Generation in Battery Technology

Firefly Energy's new Oasis Group 31 batteries represent the newest in lead-acid battery technology. They are a significant upgrade over traditional batteries offering increased storage, longer life spans, a greater depth of discharge (DoD) and a slick, easy-to-use design.

Firefly Oasis Group 31 Battery Specifications

- ❖ 12 Volt
- ❖ 110 Amp Hour
- ❖ Manufacturer recommended 75% maximum discharge
- ❖ Up to 1000 usable watt hours of battery storage
- ❖ Cycle Life: 3600 cycles at 50% DoD, 1000 cycles at 80% DoD
- ❖ Size: 76 pounds and 13"L x 7"W x 9 1/2"H

Firefly Oasis Group 31 Battery Features

- ❖ Superior reserve capacity that packs more power and energy
- ❖ Low self-discharge characteristics and unprecedented ability to recover after a long period of inactivity/non-use
- ❖ Designed for operation in rugged and extreme environments, from -4° to 122° F
- ❖ Sealed valve regulated, maintenance free design
- ❖ Absorbent Glass Mat separators prevent spilling of acid and resist damage from vibration
- ❖ Substantially higher cycle life – over twice that of conventional batteries backed by an unprecedented 2 year full and 6 year prorated warranty
- ❖ Unparalleled ability to operate under Partial State Of Charge (PSOC) without any loss in capacity and performance
